PET Strapping

Polyester strapping can be tensioned to a higher percentage of its break strength than any other strapping material. It provides superior retained tension under hot, humid conditions and is more resistant to such environments than other plastic strapping. It also provides greater load stability during storage and shipping. Our strap is strong, yet resilient enough to perform smoothly and reliably in power strapping machines and hand tools. And it's more tear and snag resistant than other plastic strapping.

PP Strapping

Stringent Japanese Quality Control System with exceptional tensile strength and banding. Fully Auto Machine Strap: Used with fully or semi-automatic strapping machines. Hand Straps comes in a handy dispenser box. Easy to use and tension by hand. Can be sealed with poly buckles, wire buckles or metal seals.
